P A S T O E

LET OP: De kast dient voor wandmontage geassembleerd te worden. De kast wordt in z'n geheel aan de muur bevestigd. Volg hiervoor onderstaande stappen. Bij kasten vanaf 2,85m dient het hangen van de kast met minimaal 3 personen te gebeuren.

NOTE: The cabinet must be assembled so it can be mounted on the wall. The cabinet is to be mounted on the wall as a whole. To do so, please follow the steps below. To mount cabinets starting at 2.85m on the wall, three people will be required.

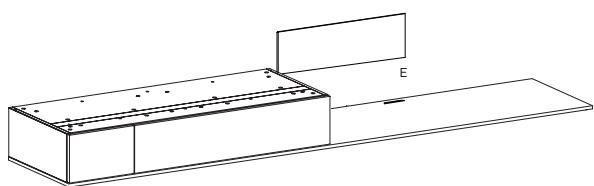

1

Bevestig de bodem mbv de bijgeleverde bouten ( $B = 20\text{mm}$ ) vanaf de onderzijde.

Secure the base from the bottom using the supplied bolts ( $B = 20\text{mm}$ ).

2 OPEN VAK / OPEN COMPARTMENT

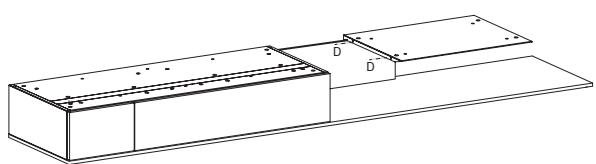

Indien er geen open vak aanwezig is ga verder naar 5.

Plaats het achterpaneel dmv de lamello's (E).

If this cabinet does not feature an open compartment, please go on to step 5. Place the back panel using the lamellos (E).

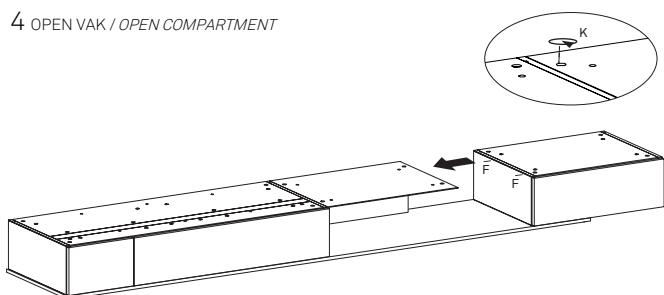

3 OPEN VAK / OPEN COMPARTMENT

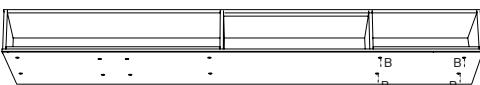

Plaats het open vak door deze over de stift (F) heen te schuiven.

Place the open compartment over the back panel by sliding it over the peg (F).

4 OPEN VAK / OPEN COMPARTMENT

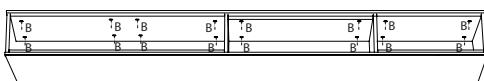

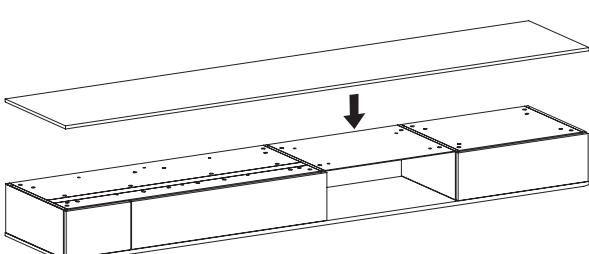

5

Bevestig de bodem mbv de bijgeleverde bouten ( $B = 20\text{mm}$ ) vanaf de onderzijde.

Secure the base from the bottom using the supplied bolts ( $B = 20\text{mm}$ ).

6

Bevestig het blad mbv de bijgeleverde korte bouten ( $B = 20\text{mm}$ ) vanuit de rompen eronder. LET OP! Gebruik hiervoor de korte bouten, de lange bouten kunnen het blad beschadigen.

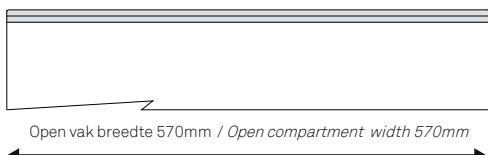

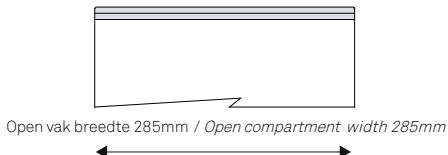

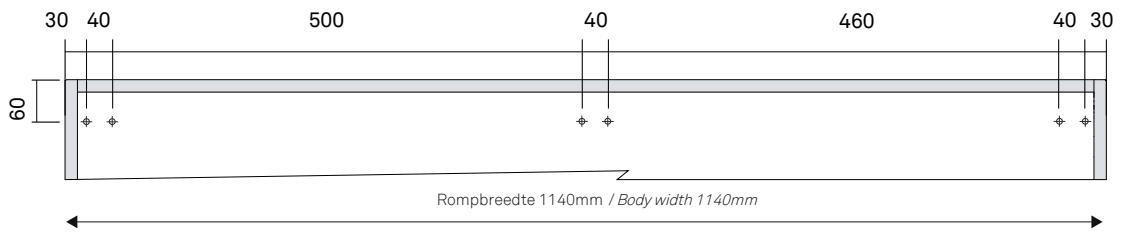

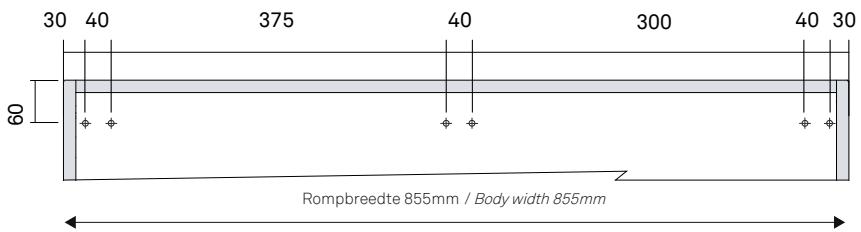

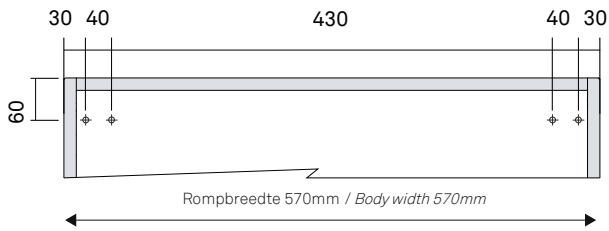

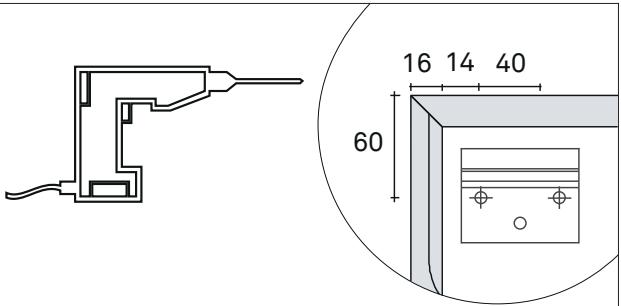

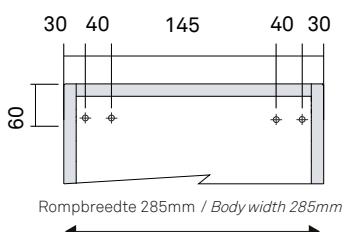

Secure the finishing top from the bodies underneath using the supplied short bolts ( $B = 20\text{mm}$ ).

NOTE! Be sure to use the short bolts for this. The long bolts could damage the top.

7

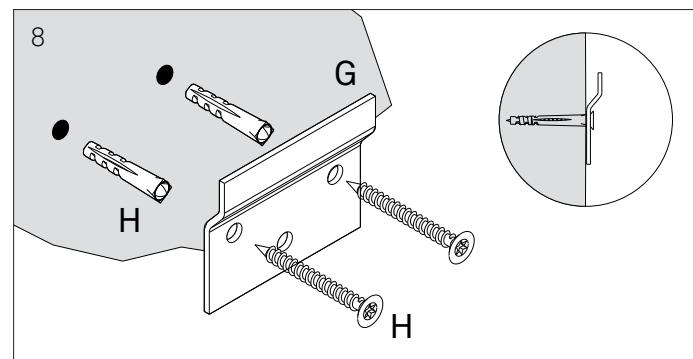

Vooraf te boren gaten: Boor afhankelijk van de rompbreedte, de benodigde gaten in de muur. Open vakken hebben geen ophangers: houdt wel rekening met de breedte bij het uitmeten van de boorgaten.

Holes to be drilled in the facing side: Drill the required holes in the wall according to the width of the body. Open compartments do not require (or have) hangers. Do take the width into account when measuring out where to drill the holes.

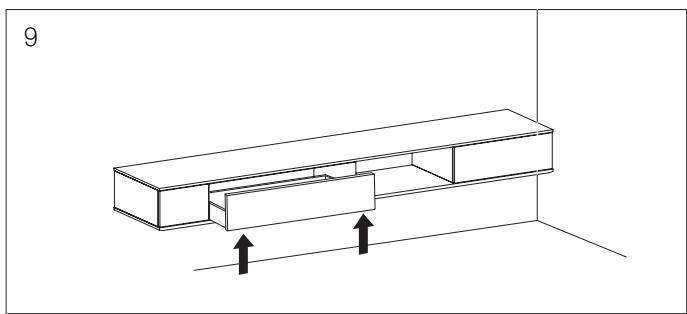

# Montage handleiding / Assembly instructions

P A S T O E

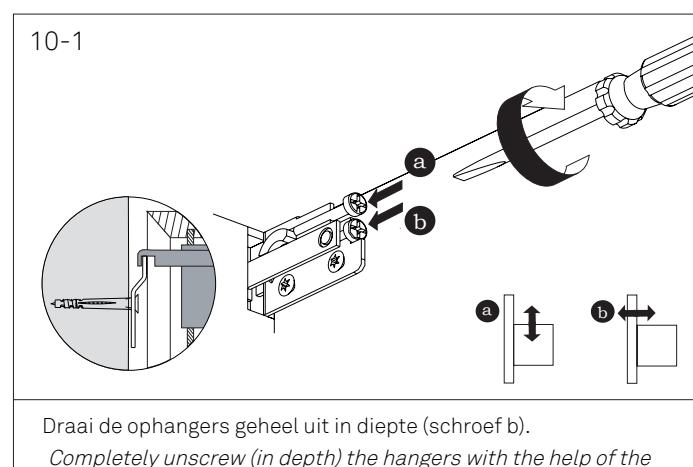

Sla de pluggen (H) in de geboorde gaten en schroef vervolgens de ophangplaten (G) vast mbv de bijgeleverde schroeven (H).

Insert the plugs (H) into the drilled holes and secure the Mounting plate (G) with the screws (H).

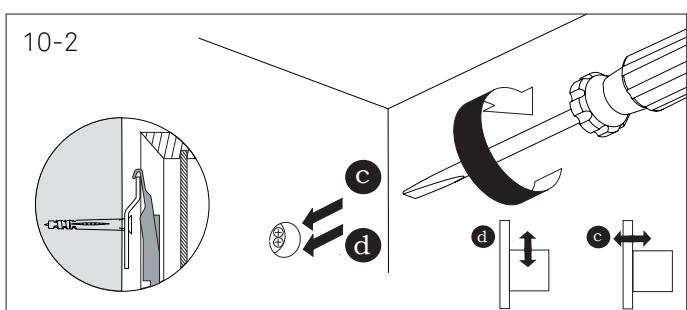

Bij het ophangen van een romp met laden dienen alle laden gedemonteerd te worden. Knip hiertoe de snappers aan de onderkant van de ladenbak in en trek de lade naar voren.

When mounting a body with drawers, all drawers must be removed. To do this, push in the snapper underneath the drawer and pull the drawer towards you.

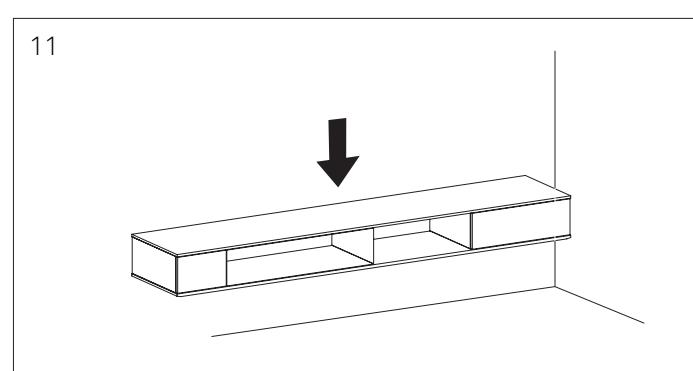

Draai de ophangers geheel uit in diepte (schroef b).

Completely unscrew (in depth) the hangers with the help of the screw (b).

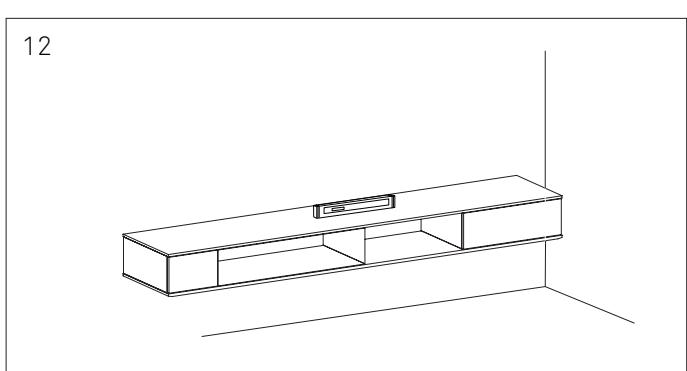

Bij rompen van 85,5cm en 114cm breed, zonder separatie in het midden, wordt bovenstaande ophanger toegepast. Draai deze ook in diepte uit (schroef c).

The above hanger is used for bodies that are 85.5cm and 114cm wide and are without a separation in the middle. Hollow this out as well (screw c).

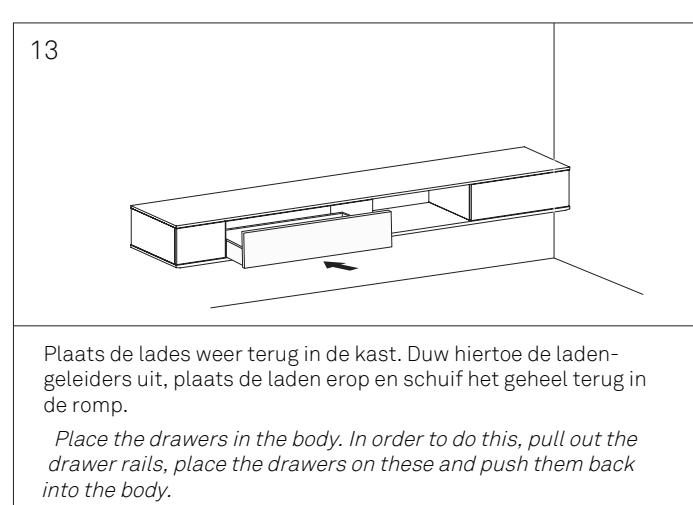

Hang de romp aan de ophangers. Zorg ervoor dat de ophangers goed over de ophangplaten hangen.

Hang the body with the hangers to the mounting rack. Make sure the hangers are properly attached to the mounting rack.

Stel de romp waterpas en plaats na het stellen de afdekkappen (I en J).

To ensure the body is level, use the screw (10a ,10d). Then slide and push the cover (I en J) over the hangers

Plaats de lades weer terug in de kast. Duw hiertoe de ladengeleiders uit, plaats de laden erop en schuif het geheel terug in de romp.

Place the drawers in the body. In order to do this, pull out the drawer rails, place the drawers on these and push them back into the body.
