Paper Desk

STUDIO JOB

Despite the advances made in technology, many of us still use paper pad and pen for grocery lists, notes & cards while sitting busily at our desks. But have you ever dreamt of a classic-looking desk made of white paper and cardboard? Thinking outside the box, Studio Job makes that crazy idea come true by extending their renowned Paper collection to our studios and working areas with the playful utility of the Paper Desk. Its surface, made of dark stained oak veneer, brings a touch of warmth to an otherwise candid desk. Enjoy a solid piece of furniture made out of many blank sheets of paper and heaps of imagination!

Detailing

Designed by Studio Job, the Paper Desk is made of paper, cardboard and paper maché.
