

# Raimond R127-R163-R199

RAIMOND PUTS | REALISATION BY OX-ID

The Raimond light is a perfect sphere of mathematical ingredients punctuated by tiny LED lights. It is specially detailed to spread warm white light in every direction and looking at the light feels like staring into the soft glow of a starry night. Inspired by the geodesic dome, designed by Buckminster Fuller, the Raimond lights are the result of almost forty years of research and dedication of mechanical engineer and self-taught designer Raimond Puts (1937 – 2012).

## *Detailing*

A double-shell sphere made with stainless steel strips, forming a thin and openwork triangular mesh that transport the electric current.
